Dear Mr Williamson

We are sorry for the delay in acknowledging the information supplied with your letter of 17th April. We did not get back home until 27th April.

We found three of the six headstones you list but were only able to decipher satisfactorily one of them, so your extracts from the churchyard list are very useful.

Enclosed is a family tree showing all the information we have so far collected on the Crosoer family. Those buried in plots 165, 186, 209 & 210 fit into the tree satisfactorily. Francis senior & Francis junior in plots 185 & 164 would only fit in if Francis senior's age was 52 not 32 and Francis junior's age was 33 not 27. Now Kent Memorial Inscriptions (Genealogical Soc. ref. KE/M1) does give the age as 52, though the Bax Papers (Gen. Soc.ref. KE/M22) give 32, and ref. KE/M7 gives 58. Clearly people had difficulty reading this age. Francis junior is 27 in all four references. I think there is a fair chance that the two Francises are the ones on the my bottom right family tree, but further evidence is needed.

The other two doubts that remain are: was Peter the father of Francis, and was Francis the father of the Henry who married Sarah Lushington.

With many thanks for your assistance,

Yours sincerely

Ann & Larry Tate
